THE VILLAGE OF BANANAL

The village of Bananal (P. I. Taunay) is situated about 4 km. north of the railroad station of Taunay. Bananal and the surrounding Indian lands are located on a low plateau which rises gently from the valley of the Aquidauana River. The soils of the plateau, laterites and tropical red soils, are derived from a crystalline base. The native vegetation belonging to the savanna belt of Central Brazil consists of scrub forest and grass, with heavier forest in the permanent water courses. The plateau is cut by numerous streams which are practically dry in the dry season but swell into relatively large streams during the rains extending from October to April. Erosion is superficial, as the vegetative cover has not been disturbed by overgrazing or extensive plowing.

The village is laid out in rectangular blocks separated by broad streets lined with mango trees. The central avenue forms part of the road which runs from Taunay to the Terena village of Ipegue, some 3 km. northeast of Bananal. Surrounding Bananal and Ipegue are large fazendas, many of which are connected by minor roads or paths.

The water supply for the inhabitants of the village is furnished by 12 wells, ranging in depth from 40 to 50 feet, 6 of which were constructed by the Government. At least two of the Government wells are furnished with pumps, one being operated by a windmill. Water for the stock, washing clothes, and taking baths is furnished by two dams on the outskirts of the village. Firewood for cooking is cut in the scrub forest outside the village. Areas not fenced in for farming are used as common pasture.

The official center of Bananal is the Post, consisting of such buildings as the residence of the manager, the school, the hospital, and the official visitors' building. These buildings are all made of red brick with tile roofs and unglazed tile floors. They are fenced in and surrounded by orange, lemon, and mango trees. None of the buildings have more than one story. In addition to these Government buildings, there is the Protestant mission school and the Catholic church. The rest of the buildings belong to the Indians. From a total of 86 buildings in the village, 75 are occupied.

Terena houses vary, not so much in size and shape, as in the material from which they are con-
